Dear Hiring Manager,

I am writing to express my strong interest in the Graduate Digital Consultant/Geospatial Consultant position with Stantec's 2027 Graduate Programme in Edinburgh. With a PhD in Computational Finance and extensive experience building production AI systems, I am eager to apply my data analytics and automation expertise to the water sector, supporting projects that improve decision-making and environmental outcomes.

My background in developing AI workflows, automated data pipelines, and predictive analytics has given me hands-on experience in data analysis, pattern recognition, and translating complex datasets into actionable insights—skills that align directly with the core responsibilities of this role. I am particularly excited about the opportunity to work with telemetry and asset data to help clients reduce carbon, improve resilience, and gain better insights from their water networks. I strongly identify with the qualities you seek in candidates. I am an Adapter comfortable with dynamic tasks, a Perseverer who stays composed facing challenges, an Eager Learner who continuously expands my knowledge, a Collaborator who values diverse perspectives, and a Problem-Solver unafraid to challenge conventional thinking. While I have technical experience, I am particularly motivated by the opportunity to develop as a well-rounded consultant, building client management and communication skills alongside technical delivery. I am available to work from your Edinburgh office four days per week as required and hold the unconditional right to live and work in the UK. I would welcome the opportunity to discuss how my data science background and passion for sustainable solutions can contribute to Stantec's water sector projects.

Thank you for your time and consideration. I look forward to the possibility of joining your team.

Kind regards,
Ivan Evdokimov
